SPOT PANCHNAMA

Panch 1- Mrs. Harshita.

Panch 2- Mr. Akash.

Today, i.e. on 11 September, 2019, we the abovementioned panchas, on being called by PI Ayush Dutt Tripathi, visited Gauri Kund, Choti Bihar Wazirabad which is outer of the city. We were informed that an infant was found dead in the said place. We were explained that we were required to carry out spot panchnama and were requested to act as panchas for the same. The Inquest Panchnama was carried out by Magistrate. We carried out the spot panchnama. The Inquest panchnama was completed at around 10:50 hours. We now proceed to carry out the spot panchnama. The body of the infant girl has been sent to the Govt. Hospital for post mortem. We are standing near Gauri Kund where she was found dead. We can see a pool which is approx. 50 metres from the place where body was found. The pool is filled with water. The place is surrounded by trees of different varieties. This place nearby looks like a forest. There are cows grazing. The road to the city is 200 metres away from the place where body was found. The road is zero crowded. The area where body was lying was with drops of blood. The police have taken the sample of the blood lying on the ground and have taken our signature on the same.

To be precise, there are 8 drops of blood on the ground varying in size. The police have taken samples of the blood on a cotton swab. The cotton swabs have been put in a plastic pouch and our signature is taken on the same and the pouch is sealed. We walk few metres towards the east. There are no drops of blood towards the eastern side. All drops of blood were located on the western side, which leads to the road. There are no houses towards the western side of the toilet. The spot panchnama commenced after the conclusion of the inquest panchnama. It commenced at around 10:50 hours and was completed by 13:30 hours. It has been read over and explained to us in Hindi and we find it to be true and correct.
