Final Opinion (After receiving Lab reports)

Findings in support of the above opinion, taking into account the history, clinical examination findings and laboratory reports of **Suman Singh** bearing identification marks described above mole on abdomen. A day after the incident of sexual violence after the Lab Reports I am of the opinion that the two accused have committed rape of Victim 2 (Suman Singh) as

1. There is presence of Semen of the Accused 1(Rajveer Vatsa) in the Vagina of the Victim.
2. There is presence of Semen of Accused 2(Shreyansh Rai) in the Vagina of the Victim.
3. Presence of Male Pubic hair (Accused 2) in the urethra of the Victim.
4. The injuries in the private area of the Victim clearly show that there was forceful sexual intercourse by the Accused.

Tanishka Jain.
